

# AEROKRAFT SAFETY POLICY

Aerokraft is committed to have safety as its highest priority including provisions of necessary resources that identifies risks to operation and proactively deals with these issues before they lead to accidents or incidents.

In this respect, Aerokraft is keen to make all necessary steps in order to fulfill the requirements regarding aviation safety according to all applicable national and international Safety regulations and guidelines as well as company policies and procedures.

In order to accomplish this commitment, every manager is responsible to generate a high level of aviation safety requirements through the continuous operational risk assessment, so that each employee is aware of his responsibilities and that his activity is performed in a safe environment.

Aerokraft is ensuring that all positions throughout the organization that affect operational safety are filled by personnel that possess the knowledge, skills, training and experience appropriate for the position.

We will assure and allocate material resources in equipment design and maintenance in a safety operation to be able to respect standards specific to aviation industry.

In order to respect the statement we will work hard to prevent any action that can lead to incidents or accidents and we are committed not to take any action against any employee that might inform us about a proposal or problem regarding aviation safety, excepting the case in which this disclosure is against the law and the company's and operators policy.

We established a reporting system that allows all employees to report any condition, action, or deviation from the defined standards which could affect Safety in order to create a safe environment for our airline customers, employees and collaborators.

All our managers and employees are committed to continual improvement of processes and procedures.

General Manager,  
Catalin ILIE
